Srijan Paul

DATA ANALYST — B.TECH COMPUTER SCIENCE (2027)
Jamshedpur, Jharkhand, India | srijanpaul6@gmail.com | +91-7735756766
LinkedIn | GitHub

PROFESSIONAL SUMMARY

Analytical and detail-oriented Computer Science student with a strong academic record (CGPA: 9.09/10) and hands-on experience in data analytics and machine learning through internships. Skilled in Python, SQL, Power BI, Excel, Tableau, and Scikit-learn, with experience in data cleaning, visualization, dashboard development, reporting automation, and predictive modeling. Enjoys working with data to uncover meaningful patterns, solve problems, and support data-driven decision-making.

AREAS OF EXPERTISE

Programming: Python, SQL, Java
Data Analytics: Pandas, NumPy, EDA, KPI Reporting, Statistics
Business Intelligence: Power BI, Tableau, Excel, Pivot Tables
Machine Learning: Scikit-learn, Regression, Classification, Feature Engineering, Model Evaluation
Tools: MySQL, Git, Streamlit

PROFESSIONAL EXPERIENCE

DataAnalytics+DataScienceIntern—AstratechAI May2026–Jul2026

- Completed an intensive internship program focused on Python, data analysis, machine learning model building, GitHub, and AI-assisted workflows.
- Applied data analytics and machine learning concepts through practical project-based workflows and model development.

DataAnalyticsJobSimulation—DeloitteAustralia(Forage) Apr2026

- Completed a Deloitte virtual job simulation focused on data analysis and forensic technology within an entry-level consulting scenar io.
- Built an interactive Tableau dashboard to present insights clearly and support data-driven decision-making.
- Cleaned, organized, and classified business datasets to identify patterns and support analysis.

DataAnalyticsIntern—FlandezTechnologies May2025–Jun2025

- Built interactive dashboards and automated recurring reports using Python and Power BI to streamline reporting workflows.
- Cleaned, transformed, and analyzed data to support KPI tracking and business decision-making.

DataScienceIntern—Slashmark Sep2024–Oct2024

- Prepared real-world datasets through preprocessing, exploratory data analysis (EDA), and feature engineering.
- Built and evaluated Scikit-learn models and tuned hyperparameters to improve predictive performance.
- Applied data cleaning techniques to improve model input quality and reliability.

PROJECTS

MediPredict—HospitalData&PatientOutcomePrediction GitHub

- Analyzed 984 hospital records using Pandas, NumPy, Seaborn, and SciPy to identify patterns in treatment costs, readmissions, length of stay, patient satisfaction, and medical conditions.
- Performed statistical analysis using ANOVA, Kruskal-Wallis, and Chi-Square tests, along with IQR-based outlier detection and multivariate visualization.
- Developed a multi-task Machine Learning pipeline using Logistic Regression, Decision Trees, and KNN to predict six patient metrics: readmission, outcome, cost level, satisfaction, LOS category, and condition.
- Built an interactive Streamlit dashboard with dynamic inputs, runtime model caching, majority-voting model ensembling, and real-time prediction and performance visualization.

SmartExpAI—IntelligentExpenseTracker GitHub

- Built a full-stack, AI-powered financial management application using Python and Streamlit with Firebase Authentication and Cloud Firestore for secure, real-time data storage.
- Implemented Linear Regression using Scikit-learn to forecast 30-day spending trends from historical transaction data.
- Developed interactive dashboards for spending trends, category distribution, savings goals, and overspending alerts.
- Added CSV-based bulk data import and automated PDF financial reporting using Pandas and fpdf2.

HRAnalyticsDashboard—PowerBI GitHub

- Designed an interactive dashboard to analyze employee attrition, salary trends, workforce distribution, and departmental per for mance.
- Created KPIs and interactive visualizations using DAX, filters, and slicers to support HR decision-making.

CreditRiskModelling GitHub

- Developed a Logistic Regression model for loan default prediction using data preprocessing and feature engineering.

- Evaluated model performance using ROC-AUC, confusion matrix, and classification metrics.

FakeNewsDetectionSystem GitHub

- Built a text classification system using TF-IDF and a Passive-Aggressive Classifier for fake news detection.
- Deployed the trained model through Streamlit for real-time predictions.

EDUCATION

ArkaJainUniversity,Jamshedpur 2023–2027
B.Tech — Computer Science
CGPA: 9.09/10

YoungPhoenixPublicSchool,Bhubaneswar 2021–Feb2022
Class 12 — CBSE

DAVUnit-VIIIPublicSchool,Bhubaneswar 2018–May2019
Class 10 — CBSE

LEADERSHIP & ACHIEVEMENTS

Member—IETEStudents'Forum(ISF),ARKAJAINUniversity 2026–Present

- Active member of the Institution of Electronics and Telecommunication Engineers (IETE) Students' Forum, contributing to technical activities, events, and student-led initiatives.

CoreMember—MachineLearning&CyberSecurityClub 2025–Present

- Contributing to club activities focused on Machine Learning, Artificial Intelligence, Cyber Security, and technical skill development.
- Collaborating with faculty and student members to support technical events, learning initiatives, and project-oriented activities.

Coordinator of TechFest—ArkaJainUniversity Feb2025

- Coordinated planning and execution of the university Tech Fest, managing logistics, volunteer teams, and vendor communication.
- Led participant registration, scheduling, and stakeholder communication to ensure smooth event execution.

PowerDash—PowerBICompetition,CloudyML Jul2025

- Created an interactive dashboard demonstrating data storytelling and visualization skills.

GenAIExchangeHackathon—GoogleCloud Feb2025

- Co-developed a Generative AI prototype addressing youth mental wellness, focusing on prompt engineering and model integration.
- Built an end-to-end prototype and demo to demonstrate feasibility and user workflows.

HackHorizonAJU2.0—ARKAJAINUniversity 2026

- Participated in a 24-hour hackathon and co-developed CIVIX, an AI-powered hyperlocal platform connecting users with verified local service professionals.
- Developed a plain-language and Hinglish search experience to help users discover nearby plumbers, electricians, tutors, and other service providers.
- Collaborated under a tight deadline to design, develop, and deliver a functional product addressing a real-world local problem.

LICENSES & CERTIFICATIONS

NPTEL Online Certification — Machine Learning for Engineering and Science-Applications, IIT Madras Jan 2026 – Apr 2026
